If a higher shine is desired consult Gerflor Technical Department for recommendations

NOTE: These instruction must be adapted to the site conditions and traffic patterns observed for the different areas where the flooring in installed.

- For modular products, wait a minimum of 72 hours after installation before performing initial maintenance.
- Never use cleaners with pH higher than 11.
- The application of a floor finish is not required.
- There are many different cleaning products on the market, they are not all equally effective.
- Grit and sand left on the surface is abrasive and will eventually scratch the flooring.
- Rubber can permanently stain vinyl floor coverings. Use non-rubber floor protectors.
- Never use household cleaning products, scouring pads, steel wool or any abrading product that could damage the surface of the flooring.

Following is a list of products recommended by the main manufacturers
