Mipolam[®] Symbioz

The original since 1937

Gerflor[®]

Mipolam® Symbioz

Setting the Standard for Durability and Sustainability

Mipolam Symbioz is the most durable option in its category, with a life expectancy of **over 20 years**. As a groundbreaking innovation, it became the first homogeneous sheet flooring made with **100% bio-based plasticizer** in 2011. Building on a legacy that began with the original Mipolam introduced in 1937, Mipolam Symbioz continues to set the standard for performance and sustainability in flooring solutions.

Mipolam Symbioz achieves an exemplary carbon footprint, without compromising performance.

We are replacing fossil materials with renewable bio-waste, transforming discarded agricultural resources into **valuable raw materials**. Soy waste from animal feed now makes up **17% of the total formula**, reducing dependence on fossil-based components.
